(a)
Independent event peak
u = 0.76‰ (q90)
excess
y = x - u
peaks closer than 10 yr
merge into one event
Anomaly x (‰), drier ↓
Year (CE)
(b)
σ = 0.8‰
limit
−σ/ξ
ξ < 0: upper limit
ξ = 0: exponential
ξ > 0: heavy tail
P(excess > y)
Excess y (‰)
